# IMEAS web Platform

## Vision

To connect values and communities

To foster cooperation and knowledge exchange

To share knowledge, tools and concrete practices

To set people into motion and find multidimensional and cooperative approaches

The IMEAS Community is made of people, institutions and citizens from different Countries, Governance Levels and Economic Sectors involved in promoting the domestic and transnational integration of low-carbon energy policy with a specific focus on the Alpine Macro Region

The screenshot shows the IMEAS web platform homepage. At the top, there is a navigation bar with the IMEAS logo and links for 'TOPICS', 'CONTENTS', 'COMMUNITY', and 'CONTACTS'. Below the navigation bar is a large banner with the text 'WELCOME TO THE IMEAS WEB PLATFORM' and a subtitle: 'a Community of people and institutions aiming at promoting the domestic and transnational integration of low-carbon energy policy making and planning in the Alpine Macro Region'. The main content area features a grid of icons representing various topics: 'Governance and Policies', 'Data and Models', 'Planning and Implementation', 'Stakeholder Engagement', 'Low Carbon Transition', 'Technologies', and 'Joint Actions'. There is also a button that says 'Do you want to see your content listed here? Upload it now!'. Below this is a section for 'Featured Contents' with three articles, each titled 'Browse energy good practices by actor similarity' and attributed to IMEAS. Further down is a section for 'Join the conversation!' with a topic 'Low Carbon Transition' and a button 'Ask us anything!'. The bottom section is divided into 'Events' and 'News'. The 'Events' section features a workshop titled 'Energy efficiency incentives for the SMEs' on 24/09/2018. The 'News' section has two articles with the headline 'Far far away, behind the word mountains, far from the countries Vokalia and Consequat, there is the road to Melibara'. At the bottom, there is a footer with 'IMEAS PLATFORM', 'SOCIAL NETWORK' (with icons for LinkedIn, Facebook, and Twitter), and 'COLDFON'.

## IMEAS web Platform

You can access to ready-to-use **tools**, **guidelines sections**, **reference** and **documentation**, **inspiring stories**.

You can participate to the **Webinars**, promote **Events**, **News** and meet **Stakeholders** and **Experts**.

You can find ways to **create links** and escape the unconnected silos and a **network of people and institutions** from different economic sectors and governance levels.

You also have the possibility to **share your own experience**, uploading contents and documentation.
